

Potential Issues	Future Growth	Long-Term Support	Basic Features	Advanced Features	Constants	Support	Employment
Lack of reliability	Update as new vending machines are added	Update map as new machines are on campus	Search bar for finding vending machine closest to searched location	Inputting USC ID to find out campus dorm to see where vending machines are closest to user's housing	Search bar for inputting lcoation	Funded by USC	Hire employees to handle user complaints and manage advertising
Unable to update due to lack of information	Personal research to update the vending machine map in real time	Encouraging user feedback via surveys and a contact section	Location tracking can be enabled to find vending machine closest to user		Map of campus (and vending machines)	Students can help update vending machine locations	Hire small group of programmers to assist in developing and maintaining site
Lack of user engagement	Potential game for going to every vending machine		Contact/FAQ/Help sections in order to ensure user friendliness		Secure site in order to keep personal information safe
